

# **NM Spirit of Wellness LLC And My Happy Medical Practice Present**

## **Bio for Jeannett Martinez FNP-BC:**

**With over 10 years years of combined medical experience of working in the emergency department, urgent care, and primary care. Since 2019, I have been working in my own regenerative and functional medical clinic, with my life partner and business partner, Zack Lopez, in Albuquerque, NM.**

**I had 2 hip surgeries and went through menopause before I turned 40. As my own health issues began to evolve, I maxed out on the ability for insurance medicine to help me recover. Functional and regenerative medicine gave my body the help it needed to regain control of my life. When my body started to heal, I couldn't in good conscience keep working in a limited space that keeps people unwell. Inspired by my own healing, I made a conscious choice to shift my focus.**

**Having personally experienced every treatment offered in our clinic, I'm fueled by a passion to share these life-changing therapies with others. From chronic pain to sexual dysfunction, these were the battlegrounds of my own recovery, now transformed into areas of expertise.**

**Now, I am happy to start teaching body beneficial medicine to other providers who are looking for ways to live healthier, longer and functional lives as well as give their patients greater opportunities to thrive and heal. Treating chronic pain and sexual dysfunction has become my area of expertise because these were areas my body needed help in recovering. I am delighted to invite you into my clinic to learn clean, green, body beneficial medicine of the future.**

**Let's make people well!**
